LOCATION

July 10th: Mt. Lee Drive & Mulholland Trail - Los Angeles

Take-off/Landing Zone: (see map below - labeled LZ)

Description of Activity: Fly Three (3) Custom Drones while Inspire 2 captures video

FLIGHT RUN BREAKDOWN (MT. LEE)

- Drones take off in a staggered fashion along the takeoff route, and then proceed to their designated altitude
- Once they reach the designated altitude and airspace (circled location), the drone will circle / fly in that airspace.
- The Camera Drone always remains on the perimeter of the pteranodon circle (at least 50 ft).
- Drones do not always fly together, occasionally a single drone will fly and perform varied routes within the designated airspace.
- All operators are on a closed communication system with an Expert 107 Pilot and Aerial Director.
- Test flights are performed the morning of the event to ensure all conditions are safe
- The circular nature of the flight path has been designed to create the most basic flight characteristics so all drones perform consistently.

Safety Assertions

*All basic Part 107 and FAA regulations are always followed and inherent within the safety guidelines.

- Landing Zone is strategically placed behind a heavily brushed area far at the furthest point of the dirt platform
- When multiple drones are in the air they are locked into their designated altitude
- Drones never fly over people, and are kept over the desert brush
- The Camera Drone always remains on the perimeter of the pteranodon circle (at least 50 ft).
- We will be utilizing ITC when drones take-off and land near the trails. The rest of the flight path is over mountainous area restricted to people.
- All operators are on a closed communication system with an Expert 107 Pilot and Aerial Director.
- Test flights are performed the morning of the event to ensure all conditions are safe
- The circular nature of the flight path has been designed to create the most basic flight characteristics so all drones perform consistently.

Additional Details:

- The drones will only be flying during the desired times as directed / specified by the director and Drone camera director, and will always stay within the set flight path.
- We will be utilizing a DJI Inspire 2 to capture aerial video
- CONTENT STRATEGY: During the event, the custom drones will be circling while the Inspire 2 gets video content of them flying.
- FAA Airspace Authorization to be submitted to Burbank Airport (KBUR) through LAANC

AIRSPACE STATUS - Mt Lee:

KBUR - Class C - Automatic Airspace Auth provided via LAANC
